

# PRECISION INJECTION MOLDING

## CUSTOM PLASTIC MANUFACTURING

Precision offers a full suite of services and turnkey solutions for all your plastic injection molding needs.

Precision manufactures plastic injection molded parts and components to meet the requirements of virtually any project. We focus on high volume production of precision plastic parts, up to approximately 12" x 18" or one and a half pounds, depending on material type and part geometry. Additionally, Precision provides comprehensive tooling fabrication services, design and engineering support, and a variety of finishing operations all under one roof.

Conveniently located in the Greater Los Angeles area, Precision serves clients throughout the United States.

### KEY FEATURES

- High volume production and close tolerances
- Small to midsize parts and components
- Secondary operations, machining, decorating, assembly
- Clamping force from 20 tons to 310 tons
- Robotics and work cell automation
- Insert molding and overmolding

### KEY BENEFITS

- On-site mold building and tooling repairs
- State-of-the-art molding machines and quality inspection equipment
- Short lead times and proven dependability
- Easy reshoring and tooling transfers
- Rapid and collaborative troubleshooting
- Local delivery availability
- Part prices with no hidden or extra fees
