

RESHORING & RELOCATION

EASY TOOLING TRANSFERS

Precision regularly manages the efficient and uneventful moving of existing molds to our facility.

Whether your tooling is located overseas or at another domestic supplier, our experienced professionals will provide you with the resources and guidance to plan and execute an effective tooling relocation. Additionally, once the molds arrive at our facility, our tooling engineers conduct a complete inspection, which includes documenting their findings. Subsequently, we produce and provide you with first article samples to inspect and approve before production begins.

Conveniently located in the Greater Los Angeles area, Precision serves clients throughout the United States.

Please visit our website for more information, our corporate brochure, and various helpful resources.

KEY FEATURES

- Consultation and guidance for a smooth transition
- Assistance with managing the relocation
- Complimentary transfer planning documentation
- Coordination with the previous supplier
- Communication with carriers
- Mold tests and production of first article samples

KEY BENEFITS
